TinoHacks

Impact Report

THE TINOHACKS TEAM

Hey there! We're the TinoHacks team, and we're so excited to let you know how TinoHacks 2017 went. It's been a long journey for all of us, but we were overjoyed to see the outcome of our work. We can't wait to share the memories we made with all our hackers, mentors, chaperones, and sponsors; it's been such a pleasure. This event would not have been possible without all of our sponsors. All of our sponsors supported us before, throughout, and after the event by sending swag, leading workshops, feeding the attendees, acting as mentors, and so much more. Without all of the help at the hackathon, we couldn't have achieved our goal: to inspire high schoolers to continue aspiring to create things they had only dreamed of in the past. For that, we would like to extend a heartfelt thanks to all of our sponsors for playing a huge role in making that possible. Because of your support and encouragement, young developers can finally make their first handprints on the promising future of technology. We are grateful that you have put your trust into the innovators of tomorrow in making society a better place for all. We hope you will continue to support us and keep inspiring high schoolers to bring their valuable perspectives out for the world to see.

WHAT'S NEXT?

TinoHacks II is coming next year for the 2018 Spring Hackathon season, and we'd love to have you as a part of our family! If you're interested in continuing your support for our movement, feel free to contact us at tinohacks2017@gmail.com. We're excited to welcome you back to the event, and our attendees are ecstatic to see you again! We plan on making TinoHacks II bigger than ever with amazing prizes and more participants!
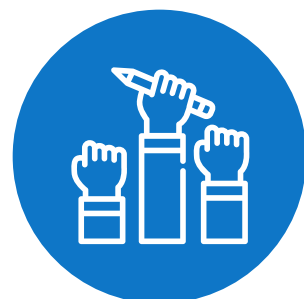

STATS

474 REGISTRATIONS
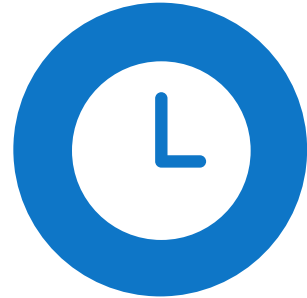

29 HOURS

37 PROJECTS

43 MENTORS

31% FEMALE ATTENDANCE

25 SPONSORS

Here is what the
participants had to say...

"The food, staff, mentors, and volunteers made everything about TinoHacks special"

"TinoHacks helped me believe that I can make change through ideas and code"

"TinoHacks gave me a great environment to really challenge and inspire myself."

"I've learned more from hackathons than from an entire year of AP Computer Science at school."
